B	Serviceable-Issuable With Qualifications	New, used, repaired, or reconditioned material which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes material with 3 through 6 months shelf life.
C	Serviceable - Priority Issue	Items which are serviceable and issuable to selected customers, but which must be issued before Condition A and B material to avoid loss as a usable asset. Includes material with less than 3 months shelf life remaining.

Do not classify material in Supply Condition H unless it is truly unserviceable and does not meet repair criteria.
S	Unserviceable-Scrap	Material that has no value except for its basic material content. No stock will be recorded as on hand in condition code S . This code is used only on transactions involving shipments to DRMOs. CONTROLLED INVENTORY ITEM CODES (CIIC CODES)

CIIC Codes are from Table 61 in DoD 4100.39-M, Volume 10, Chapter 4. These codes consist of one character (alphabetic or numeric) to indicate the security classification and/or security risk or pilferage controls for storage and transportation of DoD assets. These codes were formerly referred to as Physical Security/Arms, Ammunition and Explosives Security Risk/Pilferage Codes (SEC).

CIIC Codes include Classified Item Codes, Pilferage Codes, and Sensitive Item Codes. These three groups of codes are listed below.

CLASSIFIED ITEM CODES

This code indicates that the materiel requires protection in the interest of national security in accordance with the provisions of DoD 5200.1-R, Information Security Program. Do not accept property with Classified Item Codes of A through U at the DRMO, physically or in-place.

CODE EXPLANATION

A	Confidential - Formerly Restricted Data
B	Confidential - Restricted Data
C	Confidential
D	Confidential - Cryptologic
E	Secret - Cryptologic
F	Top Secret - Cryptologic
G	Secret - Formerly Restricted Data
H	Secret - Restricted Data
K	Top Secret - Formerly Restricted Data
L	Top Secret - Restricted Data
O	Item contains naval nuclear propulsion information. Disposal and access limitations are identified in NAVSEAINST C5511.32. Store and handle in a manner which will preclude unauthorized access to this material.
S	Secret
T	Top Secret
U	Unclassified
7	Item assigned a Demilitarization Code other than A, B or Q, for which another CIIC is inappropriate. The loss, theft, unlawful disposition, and/or recovery of an item in this category will be investigated in accordance with DoD 4000.25-2-M and DoD 7200.10-M.

CONTROLLED INVENTORY ITEM CODES (CIIC CODES)

CLASSIFIED ITEM CODES

(Continued)

- 9** This code identifies an item as a Controlled Cryptographic Item (CCI). CCI is described as secure telecommunications or information handling equipment, associated cryptographic component, or other hardware item which performs a critical COMSEC function. Items so designated are unclassified but controlled, and will bear the designation "Controlled Cryptographic Item" or "CCI". ***Do not accept property with a CIIC 9 (FSC's 5810 or 5811). 3 Apr 03***

NOTE: Codes for Department of Energy (DOE) Special Design and Quality-Controlled items under management control of the Defense Nuclear Agency (DNA) (identified by CAGE Code 87991) in the Defense Logistics Supply Center FLIS data base will be assigned and processed in accordance with DOE-DNA TP100-1, Supply Management of Nuclear Weapons Materiel.

PILFERAGE CODE

DEFINITION: A code indicating the material has a ready resale value or civilian application for personal possession and, therefore, is especially subject to theft.

CODE DESCRIPTION

- J** Pilferage - pilferage controls may be designated by the coding activity to items coded **U** (Unclassified) by recording the item to **J**

Activities may further categorize pilferage items by using the following codes:

- I** Aircraft engine equipment and parts
- M** Hand tools and shop equipment
- N** Firearms
- P** Ammunition and explosives
- V** Individual clothing and equipment
- W** Office machines
- X** Photographic equipment and supplies
- Y** Communication/electronic equipment and parts
- Z** Vehicular equipment and parts

CONTROLLED INVENTORY ITEM CODES (CIIC CODES)**PILFERAGE CODES**

NOTE: See DoD 4100.39-M, Volume 12, Data Record Number (DRN) 2863 for format and definition.

SENSITIVE ITEM CODES

DEFINITION: This code is for material which requires a high degree of protection and control due to statutory requirements or regulations, such as narcotics and drug abuse items; precious metals; items which are of high value, highly technical or of a hazardous nature; and small arms, ammunition, explosives and demolition material. (One of these codes may appear on the Receipt Screen as a result of a NIIN characteristic search.)

CODE DESCRIPTION

1	HIGHEST SENSITIVITY (CATEGORY I) Non-nuclear missiles and rockets in a ready-to-fire configuration, (e.g., Hamlet, Redeye, Stinger, Dragon, LAW, Viper) and explosive rounds for non-nuclear missiles and rockets. This category also applies in situations where the launcher (tube) and the explosive rounds, though not in read-to-fire configuration, are jointly stored or transported.
2	HIGH SENSITIVITY (CATEGORY II) Arms, ammunition and explosives
3	MODERATE SENSITIVITY (CATEGORY III) Arms, ammunition and explosives
4	LOW SENSITIVITY (CATEGORY IV) Arms, ammunition and explosives
5	HIGHEST SENSITIVITY (CATEGORY I) Arms, ammunition and explosives with a physical security classification of SECRET
6	HIGHEST SENSITIVITY (CATEGORY I) Arms, ammunition and explosives with a physical security classification of CONFIDENTIAL
8	HIGH SENSITIVITY (CATEGORY II) Arms, ammunition and explosives with a physical security classification of CONFIDENTIAL
Q	A drug or other controlled substance designated as a Schedule III, IV, or V item, in accordance with the Controlled Substance Act of 1970. Other sensitive items requiring limited access storage.
R	Precious Metals, a drug or other controlled substance designated as a Schedule I or II item, in accordance with the Controlled Substance Act of 1970. Other selected sensitive items requiring storage in a vault or safe.
\$	This code identifies Nuclear Weapons Use Control (UC) Ground Equipment which is CIIC unclassified but may require special controls. Use Control Ground Equipment is described as recorders, verifiers, adapters, power supplies, cables, programmers, monitors, controllers, code processors, power converters, computers and data modules which perform a Nuclear Weapon Use Control Function.

NOTE 1: CIIC \$ is not a valid input code for FLIS. This code is unique to DNA only.

CONTROLLED INVENTORY ITEM CODES (CIIC CODES)

DEMILITARIZATION CODES

DEFINITION: A code assigned to an item by the Item manager to identify the required demilitarization.

TABLE ID: DMIL

CHARACTER LENGTH: 1

DATA TYPE: ALPHA

CODE DESCRIPTION

- A** Non-MLI/**Non-CCLI** -- Demilitarization not required
- B** MLI (Non-Significant Military Equipment - **Non-SME**) -- Demilitarization not required. **Trade Security Controls (TSCs) required at disposition.**
- C** MLI (**SME**) -- Remove and/or demilitarize installed key point(s) as prescribed in the Defense Demilitarization Manual, or lethal parts, components and accessories.
- D** MLI (**SME**) -- Total destruction of item and components so as to preclude restoration or repair to a usable condition by melting, cutting, tearing, scratching, crushing, breaking, punching, neutralizing, etc. (As an alternate, burial **or deep water dumping** may be used when **coordinated with the DoD Demilitarization Program Office.**)
- E** MLI (**Non-SME**) -- **Additional critical items/materiel determined to require demilitarization, either key point or total destruction. Demilitarization instructions to be furnished by the DoD Demilitarization Program Office.**
- F** MLI (**SME**) -- Demilitarization instructions to be furnished by the Item/Technical Manager.
- G** MLI (**SME**) -- Demilitarization required. AEDA. Demilitarization, and if required, declassification and/or removal of sensitive markings or information, will be accomplished prior to physical transfer to a DRMO. This code will be used for all AEDA items, including those which also require declassification and/or removal of sensitive markings or information. (Special Handling Code **3** applies.)
- P** MLI (**SME**) -- Security Classified Item -- Declassification **and** any additional demilitarization and removal of any sensitive markings or information will be accomplished prior to accountability or physical transfer to a DRMO. This code will not be assigned to AEDA items.

NOTE: Any item received at the DRMO with DEMIL P will not be processed for disposal without the required certificate of declassification and a certificate of demilitarization. If the required certificates cannot be provided by the generator, the DRMO Chief and host security must be notified immediately. Place the item(s) in a secured area until host security arrives to return the property to the generator. See Supplement 1, this instruction, for a list of Classified Item Codes. If the required certificates are provided, the DRMO may process the item(s) with DEMIL Performed Code 6 (MLI residue) or 7 (non-MLI residue).

DEMILITARIZATION CODES (Continued)

- Q** *CCLI – Commerce Control List Item formerly Strategic List Item (SLI) – Demilitarization not Required. CCLI are non-MLI and are controlled by the U.S. Department of Commerce through the Export Administration Regulations (EAR) and indicated on the **Commerce Control List (CCL)**. Each CCL entry is preceded by a four-digit **Export Control Classification Number (ECCN)** and those ECCNs ending in the letter **A** or **B** are defined as *Commerce Control List Items*. These items are subject to Import Certification and Delivery Verification (IC/DV) control and other Trade Security Controls.*
- X** Indicates that demilitarization requirements or MLI applicability not determined by the ICP; local determination necessary prior to disposal action. Not a valid code for accountability acceptance **or** for system input. The system will require you to input a challenge.

NOTE: Change 1 to DoD 4160.21-M-1, DEMIL Manual, deleted DEMIL Codes H, J, K, L, M and N. The majority of items with these DEMIL Codes has been changed. However some items remain unchanged in the database. The following FSCs/FSGs that have been previously assigned DEMIL Codes H, J, K or M are considered critical: 10, 11, 12, 13, 14, 18, 58 (except 5805, 5815, 5830-36, and 5895), 6615, 6920, 6930, 6940, 8470 and 8475. Process non-critical property with DEMIL Codes H, J, K and M as DEMIL required overseas and as DEMIL B in CONUS. If an item is obviously miscoded, (J which should be A or J which should be D) submit a DEMIL challenge. Or if you receive property that is listed in the FSCs or FSGs that are considered critical, submit a DEMIL challenge and include "obsolete". See DRMS-I 4160.14, Volume VII, Chapter 2, paragraph F, for DEMIL challenge guidance.

RAPID MENU SELECTION

Once you know your way around DAISY, there's a quick and easy way to jump between menus and work screens, without paging through all the intermediate other menus. For example, you can go right from the DRMO DAISY Main Menu to the Receiving Screen without paging through the menus in between.

Each Menu and work screen has menu or program number, displayed at the top left of the screen, as illustrated below.

STANDARD WASTE AND SCRAP CLASSIFICATION (SCL) CODES

DEFINITION: SCL codes are used to classify scrap into its proper scrap commodity group to obtain maximum sales potential and to provide a uniform method for maintaining accounting records. These codes do not apply to property in other than scrap condition, i.e., that which has value other than for its basic material content. Use of SCL codes other than those listed herein is not authorized. **The existence of an SCL code is not justification for downgrading an item to scrap. If other requirements forbid the downgrading of property to scrap, even though it is in scrap condition, such property will not be downgraded.**

NOTE: Use numeric in the second and third position, except for SCLs E1O and SLO, use Alpha O.
